

ErosLink for Mac OS X Universal Binary Installation Instructions

1. Install the software from the CD first.

- Insert CD into drive
- Double-click on file that shows in window for CD:

ErosLink Installer.mpkg

- Follow on screen instructions for installing software
- You will be asked to enter your Mac OS X administrator password to begin

ErosLink Installer.mpkg

2. Restart your Mac when prompted.

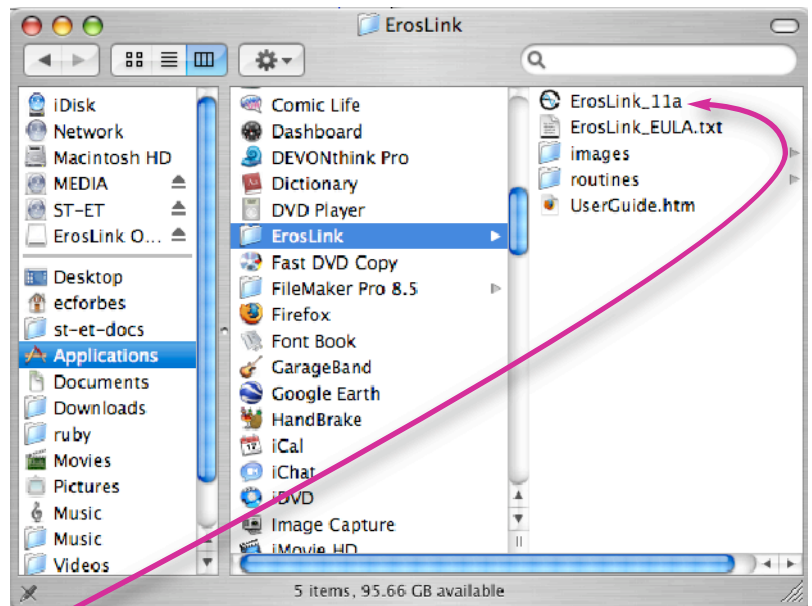

3. Connect USB end of USB to Serial adapter to any unused USB port.

4. Connect the serial cable to the USB to Serial adapter, if not already connected.

5. Connect stereo plug end of cable to **Link** jack of your ET312.

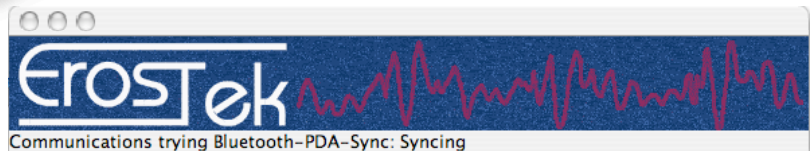

6. Make sure your ET312 is powered OFF and then power it back ON.

7. Locate the **ErosLink** folder in your **Applications** folder.

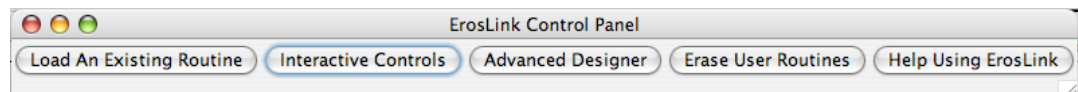

8. Double-click **ErosLink_11a** application.

9. ErosLink splash screen will appear while application searches for connected ET312.

10. ErosLink Control Panel appears.

11. Select desired function by clicking button.
